

ALSCO'S CLOSED-LOOP RFID TRACKING PROCESS

We utilize advanced **RFID technology** to track your scrubs at every stage of the process.

From our laundry facility to the end user and back, our system ensures unmatched visibility and transparency for our customers

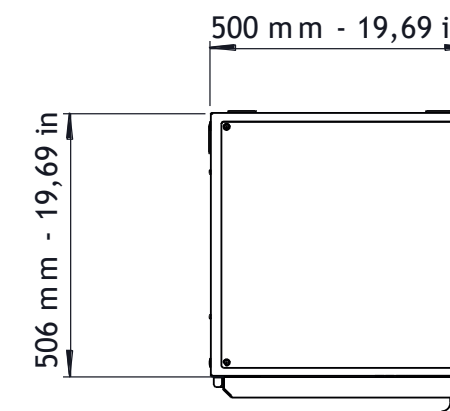

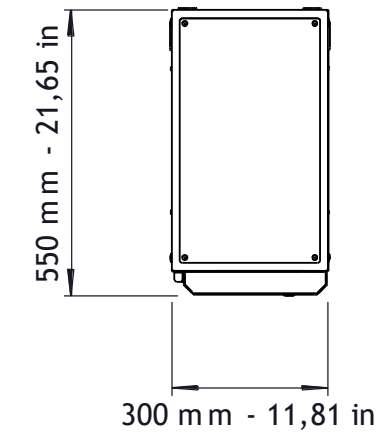

WHITE BOX - MODULAR AND CUSTOMIZABLE CABINET DISPENSER

White Box is an automated locker-style dispensing system that is fully customizable for your facility.

Each base control module can support up to 8 dispensing modules in the combination of your choice. White Box can also be used as a combo solution (dispenser and receiver), since any of the locker doors can be configured as dispensing or soiled receiving units. The simplicity of the system makes it the easiest and quickest to use and load with clean garments.

WHY WHITE BOX?

Compact and Space-Saving

The White Box's slim and sleek design fits seamlessly into tight spaces, ensuring it doesn't interfere with hospital operations.

Mixed Size? No Problem!

Since users get access to the entire cabinet, grabbing mixed sizes has never been easier.

Durable and Reliable

With a simple design and no moving parts, the White Box promises maximum uptime and minimal maintenance.

Smart and Secure

Equipped with RFID tracking, the White Box ensures that users must return the exact item they take to receive proper credit—no shortcuts allowed.

Loved by Users

End-users have praised the system for its simplicity, efficiency, and ease of use

Types of Configurations

Large Volume (to replace Scrubex LVD and LVR)

Capacity: 300 cleans scrubs, 200 soiled scrubs

**Note: Dispenser and receivers can be separated*
